

EYELIGHTS

SECURE TOGETHER YOUR RIDE

EYERIDE V2

Why our HUD technology make your ride safer?

EyeRide V2

Built to keep you riding

Since 2017, thanks to our HUD - Head Up Display technology (FRENCH, patented and designed by our engineers and doctors in photonics, former BMW and Airbus) you will never take your eyes off the road!

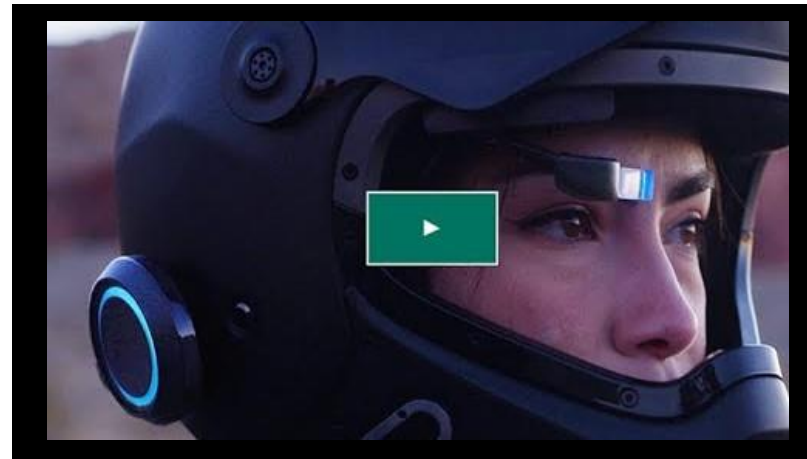

Your GPS Map, speed & calls, your playlists... are now displayed in your field of vision with ease and with optimal visual and sound comfort preserving your attention on the road.

EyeRide V2 is the smallest head-up display in the world, it can be mounted on any type of helmet
